Summary

Computer Science graduate with front-end development internship experience and full-stack projects using **React.js**, **Node.js**, and **PostgreSQL**. Skilled in **Java**, **SQL**, and **REST API** development, with a foundation in data structures and object-oriented programming.

Education

C-DAC (Centre for Development of Advanced Computing) August 2026 – February 2027 (Expected)
Post Graduate Certification in Advanced Computing (PGCP-AC) *Pune, Maharashtra*

Chandigarh University July 2022 – June 2026
B.E. in Computer Science and Engineering *Mohali, Punjab*

Work Experience

Unified Mentor Pvt. Ltd. June 2025 – September 2025
Front-End Development Intern

- Owned end-to-end development of responsive web application features across multiple client projects, from implementation through testing and deployment.
- Identified, triaged, and resolved UI and functionality defects, improving application reliability and overall user experience.
- Collaborated with cross-functional team members to translate client requirements into working features under tight sprint timelines.

Projects

Networx – Professional Networking Platform | *React.js, Node.js, Express.js, PostgreSQL, REST API, JWT, OOP* GitHub

- Architected a full-stack platform with modular, object-oriented Node.js/Express.js services exposing **15+ RESTful endpoints** across **4 domains** (JWT auth, profiles, connections, feeds) with middleware-enforced **role-based access control**.
- Designed a normalized **PostgreSQL schema (10+ tables)** with indexed joins and connection pooling, cutting redundant DB round-trips by **40%**; built a **20+ component** React.js frontend with structured logging and centralized error tracking for faster debugging.

TripGenie – AI-Powered Trip Planner | *Next.js, TypeScript, OpenAI API, Convex, Arcjet* GitHub

- Built a full-stack trip planner using Next.js API routes to orchestrate OpenAI LLM calls, generating personalized multi-day itineraries from user preferences and budget constraints with **sub-10s response times**.
- Designed JSON-mode prompt templates achieving **95% parse success** into renderable itinerary data; integrated Convex for backend data and Arcjet for rate limiting at **10 req/min per user**.

VibeConnect – Real-Time Chat Application | *HTML5, CSS3, JavaScript, Node.js, Socket.IO, WebSocket* GitHub

- Designed an event-driven Node.js architecture with server-side room management using Socket.IO/WebSocket, sustaining **100+ concurrent connections** with **sub-100ms message delivery**.
- Built multi-room messaging with typing indicators, presence tracking, and persistent history, handling **room fan-out to 50+ users** and graceful reconnection under load.

Technical Skills

Languages: Java, C, C++, Python, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3
Backend & APIs: Node.js, Express.js, REST API Design, JWT Authentication, WebSocket, Socket.IO, Convex, Arcjet
Databases: PostgreSQL, MySQL, MongoDB, Relational Database Design, Normalization
Cloud & Deployment: Google Cloud Platform (Compute Engine, IAM, VPC, Cloud Storage, Cloud Logging), Vercel, Railway
AI & Data: Generative AI, LLMs, OpenAI API, Prompt Engineering, Vertex AI, NumPy, Pandas, Scikit-learn, NLP, Matplotlib
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Event-Driven Architecture, Agile, CI/CD
Developer Tools: Git, GitHub, Postman, VS Code, Eclipse, Linux

Certifications & Achievements

Oracle Cloud Infrastructure Generative AI Professional 2025 – Oracle; examination score: **92%.**
Naukri Campus Young Turks 2026 – HCLTech; Achieved the **98.42 percentile** in the skill contest (October 2026).
Generative AI Essentials – TCS iON Career Edge
